INTRODUCTION

Our Smart Locker for retail is a fully automated and secure solution that allows for the deposit, storage and dissemination of customer orders at or near your store.

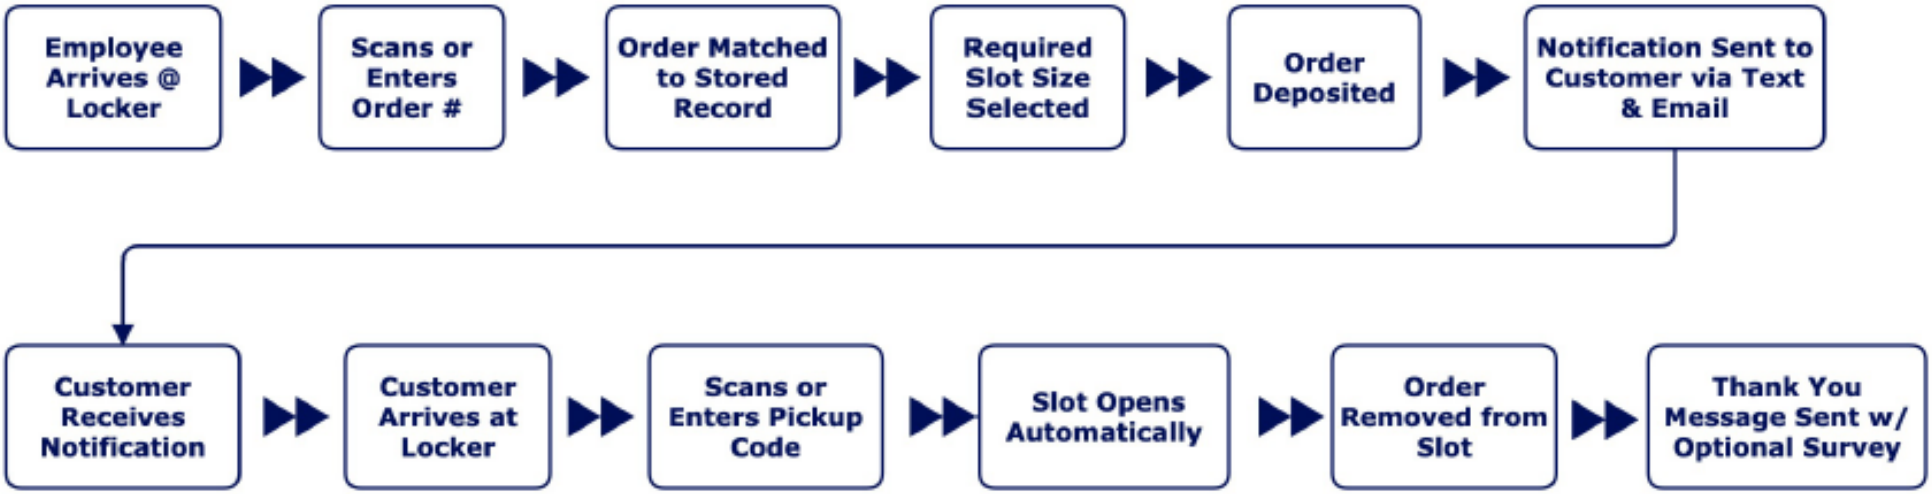
- Fully supports the BOPIS (buy online & pickup in store) model
- Fast & easy pickup for customers (scan & go)
- Fully automated
- Can be located indoor or outdoor
- Available 24/7 (depending on location)

KEY BENEFITS

- A much quicker way for customers to pickup their orders in store
- Reduce staff costs
- Extend your store hours with 24/7 pickup
- Improve your image with an innovative, customer centre service
- Advertising medium for in-store promotions & messaging
- Streamline product returns

How It Works

Our Smart Lockers are designed to streamline the process of order drop-off and pick-up. The typical steps are outlined below but our software can be configured to support your specific requirements.



Our software supports the following features:

- Automated message reminders to customers
- Configurable order expiry timeframes
- Automated expired order removal from locker

How It Works Return

Additional Locker Banks	3 – 12	19 W X 25 D X 80 H

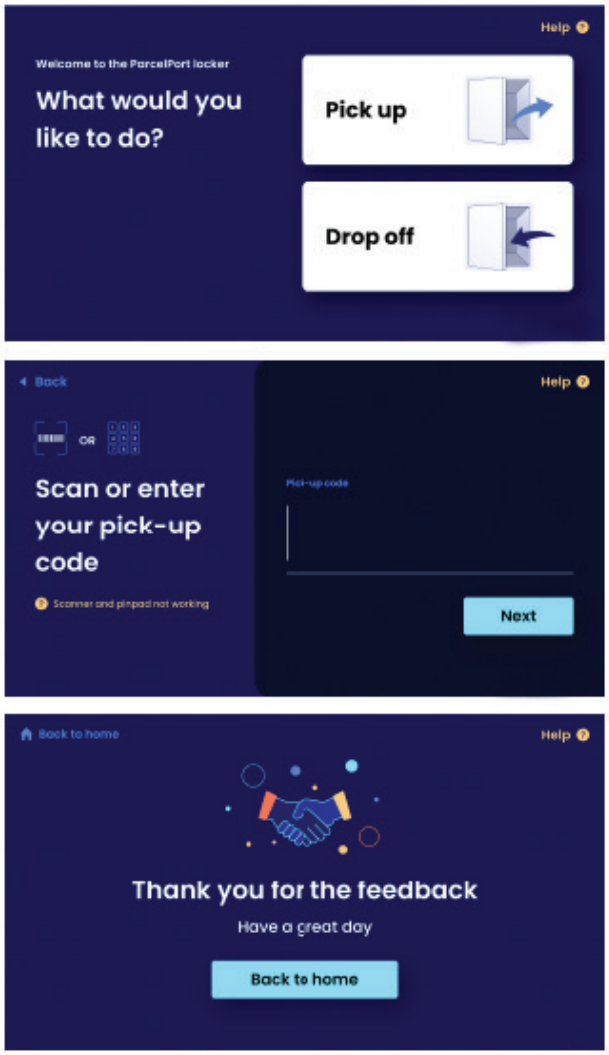
Slot Dimensions

	Width	Depth	Height
Small	15.75”	24”	4.33”
Medium	15.75”	24”	9.45”
Large	15.75”	24”	18.8”
X Large	15.75”	24”	28.5”
XX Large	15.75”	24”	38.1”

Locker Sizing

Note that:

- Maximum locker banks per host is 20
- Maximum slots per host is 200
- Slot sizes are configurable per locker bank



Locker Software

- Smart Locker hardware
- Intuitive & easy to use interface
- Single scan drop off & pickup
- Visual & auditory user prompts
- Multilingual
- Automated parcel expiry pickup
- Optional user rating & feedback
- Recipient SMS (text) & email notifications
- Remote software updates
- Integrates with store systems
- Configurable branding
- Synced with our cloud software
- Proprietary to ParcelPort

Integration Methods

Our Smart Lockers can receive order information in advance of a deposit into the locker to allow for a rapid drop-off process. Most are via the cloud but we can also get that information simply from a barcode scan.

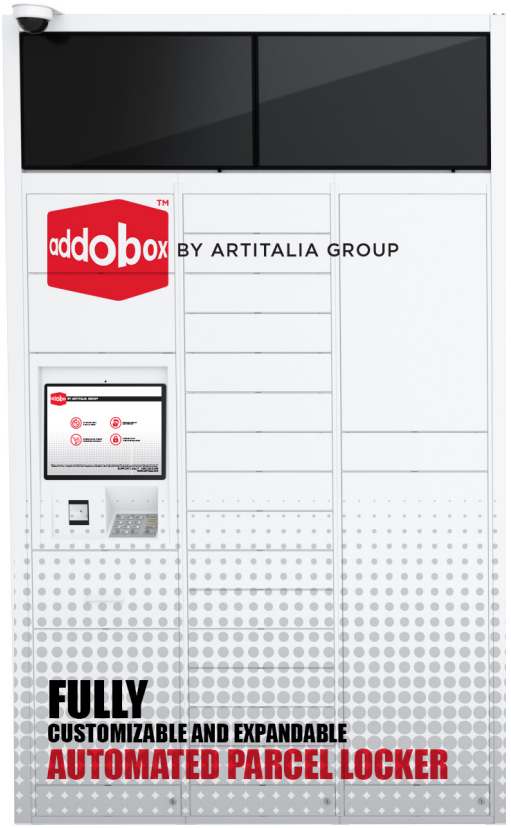
Our Input

- Via the web
- By phone
- In store

Order Creation

- Use of API
- File transfer via FTP
- Web page (manual entry)

- Barcode scan at locker



Options

- Available on the locker (using colour & vinyl)
- Configurable branding in the locker software
- Branding in the text and email messaging
- Artwork & vinyl wrapping

An Example

- Custom vinyl wrap

Addobox Options

- Dynamic ads & promotions on the locker's terminal screen
- Product returns into the locker
- Outbound shipments to local customers in the area of the store
- Mobile device pickup for customers (eliminate locker scanning)
