AURA WALL INSTALLATION

HEALTH CARE ROOMS

The Aura Wall System from Artitalia Group was originally designed as a flexible and modular wall system that could be prefabricated and easily erected in-store to create rooms large enough to hold stock and/or can be scaled down to as small as an additional fitting room.

With the current strain of Coronavirus and with the shortage of hospital rooms, this system can be used to house patients, medical equipment, and can be placed within the “social distancing” guidelines. This system allows for quick installation with limited installers.
