INLINE DIVIDER PARTITION

With the lockdown restrictions slowly beginning to ease, many of us will begin to return to our places of work. We will begin to frequent places we so sorely missed like restaurants, cafes, etc. Seems like during these trying times, these experiences have been few and far between—until now! Artitalia Group has designed the Inline Divider Partition which can be installed between tables at restaurants and food courts, office spaces, and common areas to allow your patrons and associates to comply with health and safety guidelines.

Made from clear Lexan and powder coated steel, this 36" x 36" shield is quick and easy to assemble and will provide the much needed peace-of-mind you need especially when it comes to the safety of your customers and associates.
