# PERSONAL DINING PODS

With the world currently returning to a “new normal”, we’re all wondering what dining out will look like going forward. Sure, Artitalia Group has designed a variety of hygiene shield solutions for restaurants to keep us safe and mitigate the spread of germs; inline divider partitions, restaurant table shields, etc. Now, Artitalia Group has designed a solution that will not only allow you to dine together but also allow your party to be completely isolated and free from germs from other restaurant-goers.

Made from high grade steel, composite wood, and Lexan polycarbonate, these personal dining pods will offer your customers a quaint and intimate dining experience and can be placed in restaurant courtyards, watersides, or even outdoor dining halls. These pods are available for a capacity of 2 or 4 people—you can now dine in distance and allow for a safer way to continue to run your hospitality business during the pandemic.
