# TEMPORARY WINTER SHELTERS

With the current COVID-19 social distancing regulations in place for restaurants, retail outlets, etc., and allowing only a certain number of customers in a store at a time, **Artitalia Group** has designed a customizable solution to keep customers warm and protected from the elements.

Each winter shelter comes complete with:

- Visual marks to maintain 6 ft. distance (adhering to social distancing regulations)
- Translucent panels that help protect from the elements, offering a warm and comfortable waiting area
- Translucent panels that also double for branding and marketing
- Powder coated and zinc plated steel that is resistant to changing weather conditions

Although many areas are still under strict lockdown orders, these temporary winter shelters will allow your customers to experience their favorite restaurant, retail outlet, and more while being safe and comfortable during these trying times.
