Sterilcoat: Germicidal Powder Coating available by request. Additional costs may apply.

A-LIFT

The warehouse management and logistics industries are currently seeing rapid growth in the popularity of eco-friendly practices. Saving on fuel costs, repairs for warehouse equipment such as forklifts, and leaning towards more sustainable material handling products seems like the on-going trend these days. Artitalia Group has designed a “green” material handling solution that ensures durability—and reliability—in any warehouse environment.

Artitalia Group’s Material Handling Tricycle is a heavy-duty industrial transporter that can sustain the rigors of warehouse and distribution centers. Constructed entirely out of high-quality steel, and complete with pneumatic wheels, and a cargo bin with a load capacity of 500 lbs., this material handling tricycle requires minimal maintenance and offers a sustainable solution to conventional warehouse equipment.
