

THE PROBLEM: Forklifts are a hazard in any distribution center and contribute to global warming through the emission of greenhouse gases.

THE SOLUTION: A-LIFT

A-LIFT INDUSTRIAL TRICYCLE

A heavy-duty industrial transporter that reduces your distribution center's GHG emissions but provides an efficient and secure way of moving parcels around your facility.

PARCEL MANAGEMENT MADE SIMPLE!

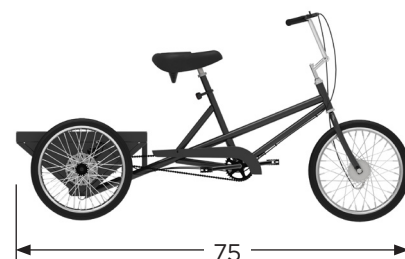

Artitalia Group's A-Lift material handling tricycle is a sustainable solution to conventional distribution center equipment that encourages safe moving of parcels around the facility. With an integrated storage platform, a three-wheel design for stability on a durable steel frame, the A-lift has the capacity to safely move around parcels in your distribution center without the risk of adding to the ever-growing concern of GHG emissions.

CUSTOM SIZES AND DESIGNS AVAILABLE.
