

## ADDOBOX A COST EFFECTIVE ONLINE ORDER PICK-UP SOLUTION!

The Automated Pick-Up Locker has been designed as a designated area where customers can collect their online orders without having to wait in line. This allows for a more efficient and seamless experience for customers who have placed orders ahead of time, and also helps to reduce wait times and congestion at the main ordering counter.

## ORDER ONLINE & PICK-UP QUICKLY AND EASILY!

Having a dedicated Automated Pick-Up Locker for online orders can benefit customers in several ways. Firstly, it can reduce wait times for customers who have already placed their orders online, as they do not have to wait in the same line as customers ordering in person. This can save time and reduce frustration, making for a better overall experience. Secondly, a dedicated Automated Pick-Up Locker can help ensure accuracy by reducing the likelihood of order mix-ups or confusion between orders placed online and in person. This can give customers peace of mind knowing that their order will be correct and ready for them when they arrive. Finally, a dedicated Automated Pick-Up Locker can enhance the overall convenience of the online ordering process, making it easier for customers to place orders and pick them up in a timely and efficient manner. Overall, having a dedicated Automated Pick-Up Locker for online orders can provide a better customer experience, improve accuracy, and increase convenience.
